Online clinical evaluation

The sales and provision of online services, such as wheelchairs, care bed, anti-sore bed, walking stick, walker, ...

Services' quality guarantee and rehabilitation equipment

In the name of One whose name is medication and whose remembrance is recuperation

The purchase of assistive technologies such as care bed, anti-bedsore mat, walking stick, walker, toilet, patient lift, has been a serious problem and challenge for patients, disabled people, wounded soldiers, their family, caretakers and also for boards of trustee, such as insurance companies, care institutions, and charity organizations.

Finding answers to the following questions often has been very difficult for patients and boards of trustee:

Which wheelchair is suitable for my aged father?

What anti-bedsore mats should I purchase for the prevention of bedsores?

What is the most appropriate price of an electronic bed?

what rehabilitation equipments are required for a mentally disabled person?

Why do wheelchairs have different prices in market?

Is there an appropriate device for patient's transference from bed to wheelchair?

...

Surveys show that incidents which occur due to the provision of inaccurate or inappropriate wheelchairs are highly frequent. Inaccurate usage of anti-bedsore mats can worsen one's bedsores. Inaccurate transference of patients from bed to wheelchair or vice-versa can cause backache in the patients' caretakers and ...

Sadra Assistive Technology Clinic

Accountable for the problems of patients, disabled people, wounded soldiers and boards of trustee during the purchase and after-sales service of rehabilitation and assistive technologies equipment

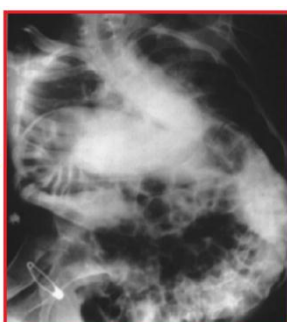

Clinical Evaluation, The Most Significant Necessity

It is important for patients and aged people to take an expert clinical evaluation before purchasing rehabilitation and assistive technologies equipment, such as wheelchairs, care beds, walking sticks, ...

When used incorrectly, rehabilitation devices can cause undesirable side effects for users.

Service Provision for Organizations

Services of rehabilitation equipment are provided as welfare services or social responsibility for the vulnerable groups of society or the supported communities of governmental organizations, public organs, private companies and charity institutions.

Considering the particular conditions of organizations, Sadra Assistive Technology Clinic provides distinct services of rehabilitation equipment.

Methods of Correspondence:

1)individualistic reference: in this method, each individual is introduced to clinic and after evaluation, the clinic corresponds the required services and their possible prices to organizations for consideration and decision.

2)Active method: in this method, a group of the supported community such as elderly retired persons or families with disabled children are introduced to the clinic and after evaluation, the clinic corresponds the needs of the community for rehabilitation equipment to the organization.

- The most important advantages of organizations' cooperation with the clinic:
- The increase of clients' satisfaction
- Reduction in the services' prices
- Clinical evaluation and the affirmation of clients' clinical need for rehabilitation equipment
- The decrease of administrative burdens in the provision of services
